

## SELF-CLOSING SAFETY GATES PROVIDE PROTECTION

Safesite, a supplier of fall protection solutions, has introduced Kee Gate, a range of self-closing safety gates as part of its product portfolio that provides workers with a safety solution when working at height.

Designed to work both externally and internally and on ladders, roof hatches, walkways, with edge protection and plant machinery, Kee Gate ensures maintenance and inspection staff can fulfil their job, follow best practices and comply with current safety standards, without putting their safety at risk. Kee Gates are spring loaded so can automatically close behind the user, providing an added level of security

and overcoming the potential for human error. This type of system is the preferred solution to chains, bars or sliding tubes, as these traditional forms of protection can lead to a hazardous void, when used incorrectly.

Kee Gate is available in galvanised steel and if required can be powder

coated in safety yellow. The safety gate is available with standard 'U' bolts for fixing to uprights of 33.7, 42.4 and 48.3 mm diameter, enabling the gate to be fixed quickly to existing supporting structures, posts or stringers. An additional fixing pack is provided which allows the gate to be fixed to square, flat or angle uprights. Easy to install or to retro-fit existing structures, such as galvanised handrails and roof edge protection systems, Kee Gate is 1 metre wide. Designed to be trimmed on-site, this solution saves companies the time and money it takes to fabricate their own gates.

Kee Gate is compliant with the requirements of EN 13374 Class A, EN ISO 14122 Part 3 & Part 4 and is CE marked to EN 1090. The system has undergone extensive testing to ensure total reliability of the gates.

## THE POSITIVE PSYCHOLOGY OF BEING IN THE SADDLE

It is a well-known fact that happiness has a significantly positive impact on work productivity. How can you keep your employees smiling and producing?

Cycling has never been more popular in the UK. Inspired by our new national heroes Wiggins, Sir Chris Hoy and Victoria Pendleton; It's no wonder that the number of people cycling to work in London has more than doubled in the last 10 years.

Those who cycle feel a broad range of positive emotions when they ride. Joy, contentment, absorption, satisfaction, accomplishment, alert, calm, peaceful, confident, powerful, excited – happy.

The benefits of cycling are easy to measure: It burns calories, reduces air pollution, relieves traffic congestion and costs less than owning a car. But,

for those of us who ride, we know there are even bigger upsides to cycling: Biking makes us happy.

Take advantage of the cycle to work scheme today and reap the rewards of a healthier workforce. The cycle to work scheme allows employers to loan cycles and cyclists' safety equipment to employees as a tax-free benefit.

With over 20,000 cycling accidents on UK roads; you'll want to ensure your employees are protected in case of an emergency and we can advise you on that too. PedalSure is a new company that covers you and your bike.

While other insurers cover your bike, PedalSure takes care of you too. We offer three grades of customised personal accident cover (Bronze, Silver & Gold), with each including a choice of comprehensive coverage levels to suit all requirements and give you that extra peace of mind. For example Bronze includes £35,000 for Accidental Death and Personal Accident, whereas Gold extends this to £150,000.

All policies include 14 to 28 Days overseas extension, amateur racing, charity events or sportive.
